

STEAM-WATER MIXERS MX20

DESCRIPTION

The ADCAMix MX20 is a series of steam-water mixers designed to provide a cheap and instantaneous source of low pressure hot water, by using existing steam and cold water supplies.

The mixer incorporates a safety device, to ensure that live steam cannot be accidentally ejected even if, for some reason, the cold water supply fails.

The water temperature at the outlet of the MX20 is easily controlled by using water and steam valves fitted at the inlets.

MAIN FEATURES

Instant source of low pressure hot water.
 Safety device against accidental steam ejection.
 Non return valves included.
 Complete stainless steel construction.
 Quiet operation.
